Sangram Chavan
Principal Architect

With over 15 years experience, I am a passionate engineer with a demonstrated history of working in SaaS based product companies. Efficient in designing and leading successful projects with a diverse knowledge of technologies. Skilled in delivering high-quality software and ensuring scalability, reliability, and maintainability of complex systems. Proficient in programming languages and platforms, cloud computing, microservices, APIs, and containerization. Adept at Agile methodologies, DevOps, and CI/CD pipelines.

PROFESSIONAL EXPERIENCE

Caizin, Pune, India — *Principal Architect*

Since September 2021

As a Principal Architect I have been -

- Leading a frontend development team for Caizin's Products.
- Collaborated with cross-functional teams to define product vision and roadmaps, prioritize features, and ensure alignment with business goals.
- Conducted architecture reviews, provided technical guidance, and mentored other engineers.
- Provide feedback to the stake owners whenever required.

Freelance Consultant, Pune – Architect

February 2018 – March 2021

I solve various kinds of technical problems as an independent consultant.

- Code Refactoring, Performance Profiling, Database Tuning
- Frontend development
- Consult technological strategy for startups.

Druva Data Solution Pvt. Ltd., Pune, India — *Principal Software Engineer*

September 2015 – September 2017

As a Principal Engineer I have been -

- Leading a frontend development team for inSync Product.
- Work with Product Managers & other development teams to support and maintain existing production code in the field and develop and deliver new enhancements and products.
- Liaise with environment specialists to ensure smooth deployments to production.
- Provide feedback to the engagement manager's on the quality of the team.
- Ensure the team keeps necessary architectural & technical design documents up to date.
- Keep the product manager's & support engineer's informed and engaged in the technical side of the project.
- Assign tasks to team members taking into account their strengths, weaknesses and capabilities.
