

Sangram Chavan

Software Architect

Software Architect with 15+ years of experience designing and delivering high-quality, scalable SaaS-based products. Deep expertise in full stack development using Angular, C#, .NET Core, TypeScript, JavaScript, and SQL Server. Proven track record leading cross-functional engineering teams, guiding architectural decisions, conducting code reviews, and implementing CI/CD pipelines. Adept in Agile /TDD methodologies with hands-on experience building REST APIs, optimizing application performance, and enforcing engineering best practices across complex codebases.

PROFESSIONAL EXPERIENCE

Independent Consultant, Pune, India — Software Architect

February 2024 -

- Provide technical consulting on full stack .NET and Angular projects for startup clients, including code refactoring, performance profiling, and database tuning.
- Guide architectural decisions aligned with long-term product goals and evaluate new technologies to maximize development efficiency.
- Deliver development services using C#, [ASP.NET](#) WebAPI, Angular and TypeScript, with a focus on scalable, maintainable design patterns.

Caizin, Pune, India — Software Architect

September 2021 - Jan 2024

Software in Caizin were completed developed & deployed using AWS Cloud Services

As Software Architect & Lead I

- Led a cross-functional development team to design and ship product features, aligning engineering roadmaps with business objectives.
- Conducted architecture reviews and provided hands-on technical guidance; mentored engineers on design, coding, and testing best practices.
- Defined and enforced high standards for code quality, maintainability, and performance through structured code review processes.
- Collaborated with product management, design, and stakeholders to translate requirements into scalable technical solutions.
- Developed and deployed serverless functions using AWS Lambda for event-driven workflows; consumed ElastiCache (Redis) for application-level caching to improve performance.
- Used AWS S3 for storing and retrieving application assets; worked within an AWS CodeCommit and CodePipeline based development and deployment workflow throughout the product lifecycle.

TECHNOLOGY EXPERIENCE

- Microsoft .Net
- ASP.NET Core, WebAPI, JavaScript, jQuery
- React, Angular
- WCF & Windows Services
- AWS
- Docker
- SQL
- Python

DEVELOPMENT SKILLS

Frameworks & Languages :

C#, Python, NodeJS, TypeScript, JavaScript, Microsoft .NET Stack

Server Side Programming:

ASP.NET, ASP.NET MVC, .NET Core, Entity Framework, Web Services, WCF, WF, CherryPy, NodeJS

Client Side Programming:

HTML5, CSS3, JavaScript, jQuery, Ajax, Angular, React, AntDesign, Bootstrap.

Testing:

XUnit, MSTest, Coded UI Test, MS Fakes, Moq, Jasmine, Jest.

Continuous Integration:

Jenkins, Cruise Control .Net, GitLab Pipelines

Deployment & Tools:

Docker, IIS, Redis, ELK-Stack

Cloud:

Amazon Web Services- S3, Lambda, ElasticCache, RDS, Code Pipeline, Code Commit, CloudWatch, CloudFront,

Independent Consultant, Pune

February 2018 – March 2021

- Architected and delivered full stack solutions using .NET Core, Angular, and SQL Server for diverse client engagements.
- Performed database tuning and query optimization, significantly improving application performance for production systems.
- Advised early-stage startups on technology strategy, infrastructure decisions, and CI/CD pipeline setup.

Druva Data Solution Pvt. Ltd., Pune, India — Principal Software Engineer

September 2015 – September 2017

Druva Product's offered both OnPrem and Cloud based solutions both deployed as docker containerized microservices.

As Principal Software Engineer I

- Led frontend development for the inSync product using Angular and CherryPy.
- Partnered with Product Managers and distributed teams to maintain production code, develop enhancements, and support smooth deployments.
- Maintained architectural and technical design documentation; provided feedback on code quality to managers and stakeholders.
- Mentored team members towards strong design, coding, and unit testing practices.
- Collaborated with platform teams on common frameworks and reusable component libraries.
- Staying up-to-date on web technologies

Tavisca, a cxLoyalty Technology Platform (Division of JP Morgan Chase & Co.), Pune, India — Technical Lead

December 2008 – September 2015

Tavisca's offered Tavel Products cloud based SaaS offering. We mostly used AWS.

As Technical Lead I

- Served as the technical communication bridge between multiple engineering teams, ensuring clarity on architecture and deployment pipelines.
- Defined and enforced release/branching strategies and CI/CD workflows using Jenkins and GitLab Pipelines.
- Maintained technical vision for the team; guided long-term architectural decisions and proactively managed technical debt.
- Designed and implemented REST API web services and scalable back-end solutions using ASP.NET MVC, Web API, and SQL Server.
- Drove adherence to best practices in SDLC, OOP, LINQ, and multithreading; eliminated knowledge silos through documentation and mentoring.

ALM Tools:

Mingle, Jira, TFS.

Methodologies:

Agile Methodology (Scrum), Pair programming, TDD, OOP.

Source Control:

Subversion, Visual SourceSafe, TFS, GIT.

Databases:

MS SQL Server, MySql, NoSQL

Nihilent Technology Pvt. Ltd., Pune, India — Software Engineer

September 2007 – December 2008

As Software Engineer I

- Designed and developed full stack features using C#, ASP.NET, JavaScript, Windows Application and SQL Server, following OOP and design patterns.
- Created high-level and detailed technical design documents; developed unit test suites and coordinated UAT and production deployments.

EDUCATION

Sunbeam Institute Of Technology, Pune — PG-DAC

February 2007 – August 2007

Savitribai Phule Pune University, Pune — Bachelor of Engineering (Computer Science)

July 2002 – July 2006
